

DISTRICRETE

CONCRETE DISTRIBUTING AND DOSING SYSTEMS

SCHIASLO-SPIL provides proven engineered concrete distributing and dosing equipment technologies, tailored for the most challenging precast projects.

The range of DISTRICRETE devices includes the portal bridge concrete distributor to supply concrete to hollow core lines or moulds or wherever is required an automatic concrete distribution system, the concrete dosing devices running on ground rails or overhead rails equipped with volumetric dosing gate, screw dosing devices or rotary valve. SCHIASLO-SPIL engineers the DISTRICRETE system according to site layout, client needs and requests.
